Stop ESCADA's fur trade!

We, the undersigned, support the Global Network Against the Fur Industry and call upon ESCADA to remove all items of clothing which incorporate real fur from their collections. This includes the collections of their daughter companies, Primera, Laurèl, apriori, cavita und BiBA.
Every item of fur, whether in the form of a collar, lining or a fur coat, means suffering and death for the animals who once wore the fur. Profit at the expense of animals is not acceptable!

Discontinue the fur trade for all time! As long as the ESCADA group continues to support the fur trade, we will not shop at any of its stores and will encourage others to boycott the company.
